# Test Anywhere, Anytime

## Get results everywhere you need to be.

**Compusense® commuter** elevates **Compusense® five** to the next level by extending your reach and enabling data collection with a laptop, tablet or PC anywhere, anytime. Never again will you have to worry about bandwidth or connectivity.

That's because **Compusense commuter** provides remote data collection that doesn't require your computer to be part of a network. With **Compusense commuter**, you can bundle one or more **Compusense five** projects into a presentation file, and distribute the presentation file to standalone **Compusense commuter** stations.

### **commuter Station**

**Compusense commuter** station is designed for companies who run sensory, market or consumer related studies in one or more remote locations or satellite labs. It's an excellent tool for doing point-of-purchase, point-of-use, mall intercept and consumer-initiated tests.

**Compusense commuter** station is licensed by the number of data collection stations.

### **Fantastic Features**

- **Testing location flexibility.** No matter where you're located you can expand your reach with **Compusense commuter** station.
- **Compatible with existing Compusense five projects.** **Compusense commuter** gives you the flexibility to run any of your existing **Compusense five** projects without a network connection.
- **Eliminate network dependencies.**
- **Quick turnaround.** You can have reports prepared within minutes of finishing a test.

### **How it Works**

Your organization needs to conduct in-store testing. You, the analyst, design the **Compusense five** test on a standard analyst station. Once you've completed the test, you simply send or upload it to each of the store-level computers running **Compusense commuter** station. Now, you can present the test(s) to consumers or employees.

**Compusense commuter** stations are easy to use and are perfect for collecting data at self-serve kiosks. You even have the flexibility of deciding whether to present multiple tests in series or from a menu. Once you've collected the results—and returned them to the central location—you can immediately integrate the results inside **Compusense five**.
